

# Nfina 5208R-HC Hybrid Cloud Solution

## FEATURES:

- IaaS solution w/ransomware protection and recovery
  - Disaster Recovery as a Service (DRaaS) included, with off-site data backup and cloud restoration
  - Managed Services included
  - Remote Management and Professional Services included
  - Nfina-View™ Monitoring Software included, provides failover recovery in minutes
  - Nfina Edge-Store™ Storage Mgmt. Software, included
  - VMware vSphere® Essentials included
  - Microsoft Windows Server Software optional
  - 2-way mirrored storage
  - Up to 12 VMs
  - 5-year warranty with 24x7 Tech Support
- 
- Dual-socket rack-mount server
  - 2x Intel® Xeon® Scalable Processors
  - Up to 192TB memory
  - Up to 6 x 2.5" hot-swap SSDs

The Nfina 5208R-HC allows you to store critical data on-site and at geo-redundant off-site locations ensuring your IT infrastructure is always available for recovery and downtime is kept to a minimum.

Nfina's 5208R-HC solutions are scalable, eight-bay, rack-mount models optimal for mid-sized companies that require more VMs, storage capacity, and performance than entry-level models. These systems are fully managed Infrastructure as a Service (IaaS) solutions designed to protect and ransomware proof your business. Copies of redundant system data are maintained on-site and off-site. In the event of an on-site node failure, the second node will automatically failover with zero downtime. We make data management easy by combining the entire process into a single solution; Infrastructure as a Service (IaaS), Disaster Recovery as a Service (DRaaS), Managed Services, and Nfina-View Monitoring Software.

Nfina's Hybrid Cloud products include easy and reliable backup and disaster recovery management tools. **Nfina Edge-Store™** and **Nfina-Store™** are management software tools designed to create and manage data storage pools. Snapshots created according to your desired frequency provide fool-proof on and off-site backup and disaster recovery protection. For added security, snapshots are encrypted during transmission with at-rest encryption available as an option. **Nfina-View™** software uses a unified management control pane to monitor your edge and cloud data storage pools. In the event of an outage or failure, Nfina-View allows you to quickly failover and run from your backups in minutes, not hours or days. If a ransomware attack occurs, your system is rolled back and restored from snapshots taken before the event occurred. Nfina-View also allows you to test your backups and failover procedures, assuring your IT systems are protected if an actual disaster occurs. Like all Nfina products, all software includes a five-year warranty and support.

Nfina Hybrid Cloud solutions come with no adware, spyware, bloatware, or trackware.

## OTHER NFINA 5208R SOLUTIONS

### SERVER

#### 5208R

The 5208R offers exceptional performance and value in a 1U server platform. The 5208R configured with eight SSD or NVMe drives makes an ideal high performance all-flash array for robust virtualized environments with demanding applications. This server is a perfect fit for small and mid-size business applications that require a HPC platform.
