

Nfina 8324R Storage Solutions

The Nfina 8324R-NAS and 8324R-SAN deliver high-density, high iOPS, and low latency.

Nfina's 8324R storage solutions ensure that all your mission-critical storage is always protected, available, and easily managed. Nfina lets you choose the best storage solution that meets your business needs, whether you are expanding existing NAS or SAN infrastructure, or need to deploy or modernize your backup & disaster recovery strategy. Organizations of all sizes will benefit from Nfina's storage solutions that help maximize efficiency while reducing storage cost.

The Nfina 8324R-NAS and 8324R-SAN are truly breakthrough storage platforms delivering high-performance storage (block and file share) for backup, disaster recovery, or business continuity solutions. They are ideal candidates for an all-flash storage array (AFA) or for creating backup storage for a HA cluster and can be loaded with 24 NVMe/SSD direct attach drives per node, alleviating the I/O bottleneck between high performance and capacity.

FEATURES:

DATA ACCELERATION

- Acceleration of random writes with Write Log (ZIL)
- Hybrid Read Cache with first level in RAM and second Read Cache level on an SSD or NVMe
- Compression for improved performance

DATA ACCESSIBILITY

- iSCSI, Fibre Channel (FC), NFS, SMB (CIFS)

DATA AVAILABILITY

- High-Availability Dual-Controller Clustering
- Active-Active and Active-Passive HA Cluster
- Dual Storage (Stretched) Metro HA Cluster and Common Storage Cluster architectures

DATA PROTECTION

- On-site and Off-site Data Protection
- N-way mirrors, Single, Dual and Triple Parity RAID
- Copy-on-Write
- Snapshots support AES Encryption while in Transit
- Snapshots support SED Encryption while at Rest

DATA INTEGRITY

- Data and Metadata Check-summing
- Self-Healing: Detecting and correcting with scrub utility

DATA BACKUP & RESTORE

- Unlimited Snapshots and Clones
- Snapshot Rollback

DATA OPTIMIZATION

- Inline Compression (LZ4, LZJB, ZLE, GZIP 1-9)
- Inline Deduplication

USER AUTHENTICATION

- Local LDAP users and groups authentication for SMB /CIFS protocol
- External Active Domain Server

SYSTEM MONITORING

- SNMP
- Nagios, Checkmk
- GUI statistics
- REST API

HYBRID ■ CLOUD SOLUTIONS

NFINA 8324R-NAS / NFINA 8324R-SAN

SPECIFICATIONS

Form Factor	Twin 2U rack-mount, 3.42" x 17.56" x 30.3" (per chassis)
Operating Temperature	10°C to 35°C (50°F to 95°F)
Processor	3rd Generation Intel® Xeon® Scalable Processors 40 cores each, 270W max
Processor Speed	2.3GHz to 3.4GHz
Socket	Dual Socket P
Memory	Up to 32 DIMMs, DDR4 ECC 3200 MHz (per chassis) 12TB Max memory capacity (per chassis) Intel® Optane™ Memory supported (200 series)
Storage	24 x 2.5" hot-swap drive bays (front – per chassis) Supports: SSD or NVMe drives 2 x Internal fixed 2.5" SSD drives (optional – per chassis) 2 x internal M.2 NVMe slots, PCIe® or SATA (22110 or 2280 FF) (per chassis)
Software RAID	0, 1, 10, optional 5
Hardware RAID/Caching	Hardware RAID optional, Caching available
Input Voltage	100-127V @ 12A, 50/60 Hz 200-240V @ 9.5A, 50/60 Hz
Power Supply	2 x hot-swap 1600W AC (per chassis)
Remote Management	BMC, IPMI 2.0, KVM over HTML5, and Redfish
TPM	Version 2.0, optional
OS Supported	Microsoft® Windows Server® 2019, 2022, VMware® ESXi™ 6.7, 7.0, vSphere® 8.0, Nfina-Store™, Open-E® JovianDSS™ & DSS7, Red Hat® RHEL 7.9-8.4, SUSE® SLES 15 SP2, 15 SP3, Ubuntu 20.04-LTS, 20.10, 21.04, CentOS™ 8.2, CentOS™ Linux 7, more options available
Regulatory Certifications	CE (Europe), FCC part 15 (US), EAC (Eurasia). NRTL certification (US, Canada), RCM DoC (Australia/NZ), International Compliance - CISRP32 & CISPR24, CB Certification (International), GS (Germany), CU Certification (Russia, Belarus, Kazakhstan), KC (Korea), Ukraine Certification, BSMI (Taiwan), VCCI Certification (Japan), NOM Mexico Certification, South Africa Certification, BIS (India), WEEE (Europe). RoHS (Europe) RoHS 20 (China)
Warranty	5 years

NFINA 8324R-NAS / NFINA 8324R-SAN

SPECIFICATIONS

I/O	4 x USB 3.0 ports (1 front, 3 rear) and 1 x USB 2.0 port (front) (per chassis) 1 x RJ-45 Serial A port (rear) (per chassis)
Display	1 x VGA port (rear) (per chassis)
Ethernet	2 x 10GbE LAN (100/1000/10000) standard, other options available (per chassis) 1 x 1GbE (Dedicated management port) (per chassis)
PCIe® Slots	6 x PCIe® Gen4 x32 FH/FL (per chassis) 2 x PCIe® Gen4 x16 LP/HL (per chassis)

Port and slot counts displayed below are for one chassis only

OTHER NFINA 8324R SOLUTIONS

SERVER

8324R

The 8324R delivers exceptional functionality by creating a solution that is easily customized to fit your specific application. Designed and built for virtualized computing environments, the 8324R provides a high-density, maximum yield solution for your IT infrastructure. Multiple options for high performance computing, including I/O, RAID, storage, and memory options make our servers a custom fit for many applications.

HYPERCONVERGED SOLUTIONS

8324R-HA

The 8324R-HA is a dual node hyperconverged/high-availability model developed for businesses requiring a High-Availability solution with a large number of VMs, maximum performance, and uptime. These dual-socket servers support 48 SSD or NVMe drives. They provide a high level of security, redundancy, and fast data response times. Certified with VMware® ESXi™ and Microsoft® Hyper-V.

8224R-E

The 8324R-E single-node edge device is optimal for businesses that require a high amount of VMs, storage capacity, and more performance than mid-level models. This dual-socket server is an excellent solution that supports 24 SSD or NVMe drives. Certified with VMware® ESXi™ and Microsoft® Hyper-V.

HYBRID CLOUD EDGE-TO-CLOUD SOLUTIONS

8324R-HC

The 8324R-HC is a dual node, forty-eight bay Hybrid Cloud solution, designed for businesses requiring High-Availability with maximum performance and uptime. Nfina's Hybrid Cloud solutions are the perfect alternative to the public hyperscale cloud, offering more benefits than the public cloud without the cost and complexity. Copies of your data are maintained on-site and at geo-redundant off-site locations. Nfina's Hybrid Cloud solutions makes storage, compute, backup, disaster recovery, managed services, and system monitoring easy by becoming your single point of contact for the entire process.

Nfina's Hybrid Cloud products include easy and reliable backup and disaster recovery management tools. **Nfina-Store™** is management software used to create and manage data storage pools. Snapshots created according to your desired frequency provide fool-proof on and off-site backup and disaster recovery protection. For added security, snapshots are encrypted during transmission with at-rest encryption available as an option. **Nfina-View™** software uses a unified management control pane to monitor your edge and cloud data storage pools. In the event of an outage or failure, Nfina-View allows you to quickly failover and run from your backups in minutes, not hours or days. If a ransomware attack occurs, your system is rolled back and restored from snapshots taken before the event occurred. Nfina-View also allows you to test your backups and failover procedures, assuring your IT systems are protected if an actual disaster occurs.
